**Re: City of Gautier
City Park Pier Replacement**

Dear General Spraggins,

Please find attached for review a **SHOVEL-READY project** designed to improve coastal water quality, protect our natural resources, and mitigate impacts to fish and wildlife. Utilizing GOMESA funds, the City proposes to replace the existing decaying timber pier at the City Park with a new concrete-piling pier.

The City Park Pier Replacement Project is estimated to require \$2,000,000.00 to complete. The City is requesting approximately 100% of the total project cost in GOMESA funds to fully implement the project and address the water quality and environmental needs associated with the existing pier. The proposed improvements will provide a more durable and sustainable structure while helping protect our coastal waters, natural resources, and wildlife.

Best regards,

Carlos Moulds
City Manager
